Purpose

The Patient Protection and Affordable Care Act of 2010 requires nonprofit, tax-exempt hospitals such as Twin Lakes Regional Medical Center (TLRMC) to assess the healthcare needs of their communities every three years and to adopt an implementation strategy to address the needs identified. Each hospital must make its Community Health Needs Assessment (CHNA) and Implementation Strategy widely available to the public. This is the current CHNA and Implementation Strategy for Twin Lakes Regional Medical Center.

TLRMC is dedicated to strengthening the health of the people we serve. In the past, TLRMC has employed a mixture of different methods and intuition to assess the health needs of our communities. Hospital leadership, outside healthcare consultants, physicians, Board of Directors and others then adjusted services to meet those identified needs. Assessing community health needs through a review of available health data and discussion with area health care partners, community leaders and representatives of the many groups served by the hospital give TLRMC and its healthcare partners the opportunity to identify and address the area's most pressing health care needs.

About Us/Service Area

Twin Lakes Regional Medical Center, in Grayson County, Kentucky, is a 75-bed regional hospital providing inpatient and outpatient services to the residents of a six-county area with a population of more than 90,000. In 1951, concerned citizens made a commitment to serve the medical needs of the community by building the 14,000-square-foot Grayson County War Memorial Hospital. Located near the original facility, TLRMC has grown to almost 300,000 square feet, is now one of the region’s largest employers, and has come to be recognized as a regional health care provider.

The mission of Twin Lakes Regional Medical Center is that we exist to heal the sick, relieve pain and suffering, and improve the quality of life for the people we serve. It is our vision to be recognized by the people it serves as the provider of choice for their health care needs and as a leading force for progressive change within our community.

The primary service area for Twin Lakes Regional Medical Center consists of Grayson County including the city of Leitchfield (population 6,749 July/2011). The secondary service area includes, but is not limited to, Breckinridge, Ohio, Butler, Edmonson, Hart and Hardin counties in Kentucky.

For the purpose of this report, all references to “service area” are intended to mean Grayson County and the communities within the county.

**Summary of key demographic information for Grayson County**

- Population is slightly older than the Kentucky average
- Grayson County is more than twice as rural than the average for the rest of the state
- Grayson County has a lower percentage of people 25 and above who are graduates of high school or beyond
- The level of persons 25 and older with a Bachelor’s degree or higher is significantly lower than the rest of the state (9.1% to 21.8%)
- Grayson County has a much lower median household income compared to Kentucky and the rest of the country (approximately $33,091 compared to $41,576 for Kentucky and $51,425 for the United States) and a larger percentage of persons living below the poverty level.
Health Outcomes Map  Grayson County shown as GY

Source: countyhealthrankings.org

According to County Health Rankings 2015, a collaboration between the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute, Grayson County is ranked 71st out of 120 counties in Kentucky for Health Outcomes. Health Outcomes are based on an equal weighing of length and quality of life to identify how healthy a county is. This is a drop from 53rd in 2013.

Health Factors Map  Grayson County shown as GY

Source: countyhealthrankings.org

According to County Health Rankings 2015, Grayson County is ranked 79th out of 120 counties in Kentucky for Health Outcomes. Health Factors are a variety of statistics used to identify what influences the health of a county. This is a drop from 77th in 2013.

Health Factors include
- Tobacco use
- Sexual activity
- Quality of care
- Income/Children in poverty
- Environmental quality

- Diet and exercise
- Teen birth rate
- Education levels
- Family & social support
- Number of fast food facilities

- Alcohol use
- Access to care
- Employment statistics
- Community safety
- Recreation
Kentucky Health Facts.org is sponsored by the Foundation for a Healthy Kentucky with the aim of providing ready access to key health data for Kentucky communities. Their hope is that communities will use this data to identify local needs, to motivate change, to guide planning efforts, and to take meaningful, positive action toward improved health.

Healthcare resources within the community
- Twin Lakes Regional Medical Center
- Physicians – full time general practice and specialists and visiting specialists
- Dentists and optometrists
- Quick Care – urgent medical clinic
- Big Clifty Medical Center
- Caneyville Family Practice
- Grayson County Health Department

Methodology of CHNA for Twin Lakes Regional Medical Center

In conducting the CHNA, non-profit hospitals such as Twin Lakes Regional Medical Center are required to take into account input from persons who represent the broad interests of the community served.

TLRMC developed a survey to gather health information and opinions of Grayson County residents 18 and over. The survey was conducted in September and October, 2015 using an on-line survey tool and by distributing printed copies in various locations throughout the community. Registration clerks at the hospital handed out the survey to patients and family members. The on-line survey was promoted through newspaper advertisements, business cards and on the TLRMC Facebook page. Emails with a link to the survey were sent to Grayson County Chamber of Commerce members, local industries, and employees of the Grayson County school system and the hospital. Printed copies were delivered to an assisted living facility, the Grayson County Health Department, Big Clifty Medical Complex and the Caneyville Family Practice.

Information gaps that limited the ability of TLRMC to assess the community’s health needs were identified. The primary obstacle was reaching elderly, low-income and/or rural residents due to a lack of internet access and willingness to participate. TLRMC made efforts to reach these individuals with written surveys.

757 Grayson County residents participated in the survey. The questions were in three primary categories:

- Demographics
- Personal health information
- Perceived health needs of the community
Survey questions and answers

Where do you live?

52% Leitchfield
17% Clarkson
14% Caneyville
11% Falls of Rough
3% Big Clifty
3% Other

What is your gender?

77% Male
23% Female

What is your age?

20% 18-31
17% 32-40
15% 41-47
14% 48-53
12% 54-62
22% Over 62

How many people currently live in your household?

40% 1
28% 2
22% 3
10% 4 or more
When was the last time you had an eye exam?

- Within the past year: 53%
- Within the past two years: 23%
- Within the past five years: 12%
- More than five years ago: 12%

Was there a time in the past 12 months when you needed to see an eye doctor but could not because of the cost?

- Yes: 20%
- No: 80%

About how long has it been since you last visited a dentist?

- Within the past year: 58%
- Within the past two years: 17%
- Within the past five years: 13%
- More than five years ago: 12%

Was there a time in the past 12 months when you needed to see a dentist but could not because of the cost?

- Yes: 28%
- No: 72%
How would you rate the overall quality of care provided at Twin Lakes Regional Medical Center?

- High: 31%
- Good: 44%
- Average: 22%
- Poor: 3%

In the past 12 months if you used another hospital other than Twin Lakes Regional Medical Center, what was the reason?

- Better doctors: 23%
- Nicer facilities: 36%
- Service not offered at TLRMC: 5%
- Other: 36%

Are you able to visit a doctor when needed?

- Yes: 81%
- No: 19%

If you answered "no" above, please choose all that apply:

- No appointment available: 69%
- Cannot afford it: 27%
- Cannot take time off from work: 17%
- No specialist in the community: 6%
- No transportation: 1%
In general, how would you rate your health?

- Very good: 25%
- Good: 57%
- Fair: 15%
- Poor: 3%

About how long has it been since you last visited a doctor for a routine checkup or physical examination?

- Within the past year: 72%
- Within the past two years: 16%
- Within the past five years: 7%
- More than five years ago: 5%

Does your doctor give you easy to understand instructions about how long to take care of your health?

- Always: 66%
- Usually: 29%
- Sometimes: 5%
- Never: 0%

Have you ever taken a class on how to manage your diabetes yourself?

- Yes: 73%
- No: 23%
- Does not apply: 4%
Have you had your blood pressure taken by a health professional in the past 12 months?
- Yes: 94%
- No: 6%

Are you currently taking medication to help control your high blood pressure?
- Yes: 35%
- No: 65%

About how long has it been since you last had your blood cholesterol checked by a health professional?
- Within the past year: 71%
- Within the past two years: 12%
- Within the past five years: 7%
- More than five years ago: 2%
- Never had it checked: 8%

At your last well-child visit, did a health professional talk to you about?
- Sugar sweetened drinks: 26%
- Television viewing: 21%
- Exercise: 32%
- Nutrition: 35%
Have you had a flu vaccine during the past 12 months?

- Yes: 67%
- No: 33%

Which of the following are you trying to do about your weight?

- Lose weight: 15%
- Gain weight: 18%
- Stay the same weight: 2%
- I am not trying to do anything about my weight: 65%

If you needed mental health treatment or counseling within the past 12 months but did not get it, what was the reason?

- Could not afford it: 39%
- Did not know where to go: 38%
- Embarrassed or fearful other people would find out: 27%
- Did not think it would help: 23%
- Too far to travel: 22%
Has a current or former spouse, boyfriend or girlfriend EVER hit, slapped, pushed, kicked or physically hurt you in any way?

- Yes: 12%
- No: 88%

What kind of healthcare insurance coverage do you have?

- I do not have coverage: 72%
- Commercial insurance: 16%
- Medicaid: 9%
- Medicare: 3%

During the past 12 months, was there any time when you needed medical care from a doctor but did not get it because you could not afford it?

- Yes: 15%
- No: 85%
In the following list, what behaviors have you or your family experienced in the past 12 months? (Check all that apply.)

- Being overweight: 54%
- Poor eating habits: 47%
- Tobacco products: 27%
- Do not use sunscreen products outdoors: 20%
- Not using seat belts: 8%
- Alcohol abuse: 6%
- Abuse or overuse of prescription drugs: 3%
- Drug abuse: 2%
- None of the above: 27%

What do you think are the top 3 health problems facing our community? (Choose only 3.)

- Alcohol or drug abuse: 46%
- Obesity: 43%
- Prescription drug abuse: 42%
- Ability to pay for healthcare: 34%
- Smoking/tobacco use: 23%
- Lack of exercise: 19%
- Cancer: 17%
- Need more doctors: 15%
- Teen pregnancy: 14%
- Diabetes: 12%
- Poor nutrition: 12%
- Mental health: 11%
- Heart disease: 6%
- Lack of dental care: 3%
- Suicide: 2%
What is needed to help improve the health of you and/or your family? (Choose up to 2.)

- Healthier food options: 50%
- Recreation/exercise facilities: 39%
- Safe places to walk/play: 23%
- Affordable health screenings: 19%
- Job opportunities: 17%
- More physicians: 15%
- Substance abuse services: 6%
- Mental health services: 4%

What health issues would you like information/education about? (Choose up to 3.)

- Exercise/physical activity: 46%
- Nutrition: 40%
- Blood Pressure: 19%
- Cholesterol: 19%
- Diabetes: 18%
- Heart disease: 17%
- Mental health/depression: 14%
- Quit smoking: 12%
- Vaccination/immunizations: 8%
- Dental: 7%
- Drug and alcohol abuse: 5%
- Eating disorders: 5%
What can Twin Lakes Regional Medical Center do to better meet the healthcare needs of our community? (Open ended question)

2012

- Need more doctors/can’t get appointment (32)
- Lower the cost (16)
- Improve ER quality/wait times (16)
- Need more public education (13)
- Be nicer, show more concern and respect (9)
- Give more free care to poor people (8)
- Quick Care needs to be open more (8)
- Psychiatry (6)
- Better doctors (6)
- Build a fitness center/indoor pool (5)

2015

- Need more doctors/can’t get appointment (79)
- Lower the cost (23)
- Improve ER quality/wait times (22)
- Better doctors (19)
- More public health education (15)
- Build a fitness center/indoor pool (9)
Community Forum/
Focus Group

The Twin Lakes Regional Medical Center’s CHNA team tabulated the results from the surveys (on-line and printed) and supplemented them with health statistics and demographic information. (See pages 7 – 19.) TLRMC then invited representatives from a variety of backgrounds to a Community Forum/Focus Group on February 2, 2016 to review the survey results and provide recommendations for the hospital’s community benefit focus.

Professions represented
- Physicians
- School administrators, teachers and staff
- Health Department
- Dietician
- Industry/Manufacturing
- Optometrist
- Hospital Board members
- Law enforcement
- Hospital leadership

The purpose of the meeting was to
1. Present the findings of the survey, health statistics and demographic information
2. Get input from the group in identifying the top health issues facing Grayson County
3. Get the group’s recommendation on the core health issues for the hospital's community health focus for the next three years

Once the information was presented a group discussion was held. Attendees were asked for their top health priorities without concern about the practicality of the hospital's ability to impact the issues.

Top priorities (in alphabetical order)
- Access to care
- Drug abuse
- Information/awareness of health issues
- Lack of physical activity options
- Mental health/suicide
- Nutrition
- Obesity

These results were then presented to the Population Health Committee for their consideration and input. (See page 22.)
**Population Health Committee**

To put the 2012 CHNA report into action, Twin Lakes Regional Medical Center created the Population Health Committee. This group of people works on improving the health of our community guided by the Community Health Focus Points set in the 2012 CHNA. The Population Health Committee is made up of hospital employees, industrial leaders, the Grayson County Schools superintendent, registered dieticians, a pharmacist, a representative from the Kentucky Cancer Program and a representative from the Grayson County Health Department. The Twin Lakes Regional Medical Center CEO chairs the committee. The Population Health Committee meets monthly to discuss and implement plans on improving the health of the community.

On Friday, March 4, 2016, the Population Health Committee met to consider the input of the community focus group, the size and severity of the needs, available data, and the ability to have an impact as a hospital. The Committee made their recommendations of Community Health Focus Points to the hospital.

**Community Health Focus Points**

After carefully considering the results of the Community Health Survey, the most recent health and demographic information available, and input from the Community Forum/Focus Group and the Population Health Committee, the following needs were identified by hospital leadership as the community health focus points for Twin Lakes Regional Medical Center in 2016 – 2019.

- Smoking
- Information/awareness of health issues
- Lack of physical activity options
- Nutrition/obesity

**Board Approval**

The 2015 Community Health Needs Assessment was approved by the Board of Directors for Twin Lakes Regional Medical Center on Tuesday, March 15, 2016.
Next Steps

The publication of this report is another step to a healthier Grayson County. It is the intention of Twin Lakes Regional Medical Center that the contents of this report be used to inform Grayson County residents of what their fellow citizens think are the most important health issues in their community. Additionally, TLRMC hopes this report will serve as a foundation to build lasting relationships between Twin Lakes Regional Medical Center, community partners and residents of Grayson County.

This report serves as a stepping stone to future studies of community health concerns, the enhancement of health services offered to the community and the spark to create community partnerships that address the health needs of the community.

Twin Lakes Regional Medical Center recognizes that we do not have adequate resources to solve all problems identified. However, we do have the obligation and ability to be the change leader where possible. We view this plan as providing guidance around how we, along with other area organizations, groups and agencies, can collaborate to improve the health and medical care available to the people of our community.

In order to addressing the prioritized needs, TLRMC will engage key internal and community partners. Customized strategies have been developed and will be continued. The strategies include, but are not limited to, modifying policies, public and private; providing support, information and incentives; improving access; enhancing skills; and changing consequences. Follow-up surveys will measure the success of each initiative and provide the next areas of focus for the hospital.

To inform the public and partners of our goals and to increase awareness of our plan, Twin Lakes Regional Medical Center will publish the full CHNA report on the hospital’s website (www.tlrmc.com), promote the report on social media channels such as Facebook and Twitter, and submit to local news media. Printed copies will be available for the public at the hospital as well.
